

Lead-Based Paint Abatement and Program Management

We are proud of our knowledge and expertise in the area of lead paint abatement. Prudent Technologies Inc., has completed full-service lead abatement and management in all sizes of office buildings, banks, schools, federal facilities, airports and more. Prudent technicians are state-certified and licensed in all disciplines of lead, and are able to design a safe remediation for all lead hazard needs.

Service and Capabilities

Project Design

- Development of project specifications
- Project estimates
- Occupant protection plans
- Lead-bearing surface abatement and hazard reduction
- Interior dust abatement and cleanup
- Clearance standards and testing protocols

Risk Assessment

- Onsite investigation and reporting of lead hazards
- XRF analysis and reporting
- Dust wipe sampling

Lead Inspection

- Surface-by-surface investigation
- Paint chip sampling

Project Monitoring

- Federal, state, and local laws, and regulatory compliance
- Occupant and worker safety compliance
- Specification compliance

Project Clearance Testing

- Post-abatement/remediation clearance inspections
- Visual assessments
- Dust wipe sampling/preparation for laboratory analysis

Lead Program Management

- Program design and implementation
- Program coordination

Lead Abatement

- Removal, replacement, enclosure/encapsulation of lead-based painted surfaces
- Site preparations
- Cleanup, transportation, and disposal
